

Readme

Prerequisites:

1. Clone this repository
2. Make sure that you have installed jupyter notebook
3. Then, install the python libraries contained in the "requirements.txt" file, namely pandas and numpy.
4. From start menu call "Run & Restart All" to run "submit/Data_Preparation_Task.ipynb" notebook.

Output: Running this NB will generate a new file, named "df_final.zip" which looks like the "misc/df_final_eg.png".
